

INFORMATION – PRIOR TO INSTALLATION

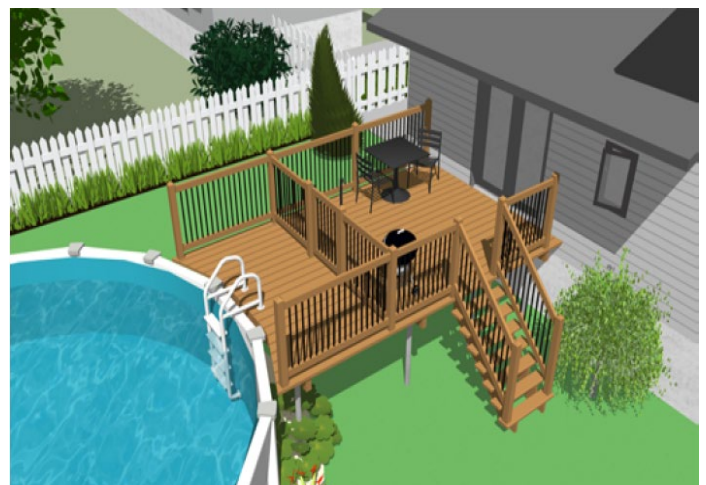

Visual Examples - Safety Features Preventing Access to the Pool

Please note that the visual examples below are for illustrative purposes only. Additional safety measures to restrict access to the pool may be required depending on your property's configuration. Other installation options may be possible upon review and approval by the Urban Planning Department. It is the homeowner's responsibility to ensure that all safety features comply with applicable regulations.

FENCE enclosing the pool (The safety gate must be equipped with self-closing and self-latching passive security device)

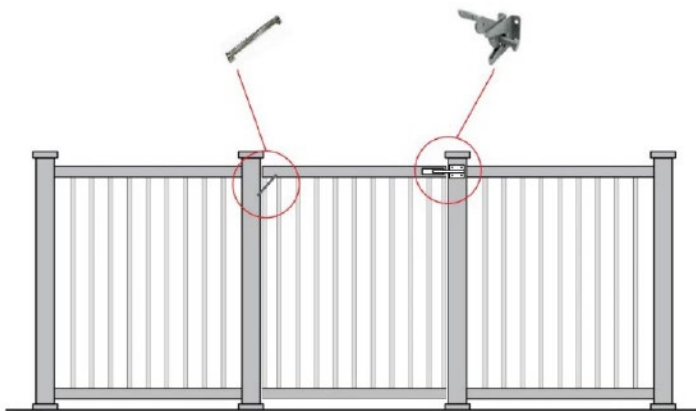

FENCE preventing access to the pool from the home (The safety gate must be equipped with self-closing and self-latching passive security device)

Self-closing / Self-latching PATIO DOOR / GARAGE SERVICE DOOR preventing access to the pool from the home

Self-closing and Self-latching PASSIVE SECURITY DEVICE to be installed on an existing patio door, a garage service door or on the safety gate of a fence

Device installed on the outside of the enclosure at 1.52 m from the ground

**LADDER equipped
with a self-closing and
self-latching safety gate**

**Various types of WINDOW RESTRICTORS preventing children to gain unsupervised
access to the pool**
